

## How to Use This

### Book

Throughout this text, you'll see icons in this left column, drawing your attention to important points, dates and critical tasks. They are listed below with short explanations.

**Contact:** This icon indicates that contact information, phone or email, will follow. For a copy of one of the packet sections, call (206) 684-5044.

### **Document**

**Reference:** This icon tells you when to refer to another document for further information.

# Street Improvement Permit Process Information Packet

## ABOUT THIS PACKET:

This packet has three sections, each of which can function independently or together, but each focuses on a different part of the development and permit process. Brief explanations of each section are below. See the box at left for contact information.

- The **Applicant/Developer Packet** is one of three informational packets designed to help you understand and to meet the requirements that each applicant/developer must meet in the City of Seattle's street improvement permit process.
- The **Engineer/Designer Packet** explains the steps required of engineers/designers in the City of Seattle's street improvement permit process.
- The **Contractor Packet** explains the steps required of contractors in the City of Seattle's street improvement permit process.

Each document within the packets has its own page numbering system, seen in the footer of the second page in each document. In the Applicant/Developer Packet, for example, Publication 461, is numbered: Publication 461 page 1 of 2, etc.

# Engineer/Designer Packet

**Contact:** For more information or to request a copy of either the Applicant/Developer Packet or the Contractor Packet, call (206) 684-5044.

The Seattle Transportation Street Improvement Permit work is to be completed in concert with the Department of Design, Construction and Land Use (DCLU) Permit Work. Street Improvement Permits often are separate from Seattle Public Utilities (SPU) Watermain permit work. For information on SPU Watermain permit requirements, see <http://www.seattle.gov/util/planning/watermain>.

This Engineer/Designer Packet is one of three informational packets designed to help you understand and meet the requirements of the Seattle Transportation Department's Street Improvement permitting process. The other two packets, the Applicant/Developer Packet and the Contractor Packet, are under separate cover.
